**Note:** This page has several filters on it, so if the item you're searching for isn't shown, you may need to change the filters as detailed below.

The filters and actions available on the option toolbar are detailed below:

- Add: This button allows users to add a new item directly from this page. Refer to the [Create a New Inventory Item](#) section for instructions on adding a new item.
- Refresh: This button refreshes the list, but without resetting the page filters. You may want to use this button if another user has made an inventory transaction and you want to get the latest quantity on hand information from the database without losing your filters for example.
- Actions: This button allows you to choose data import and export options. Refer to [Importing and Exporting Data](#) for details on performing these actions. You will also be able to re-order items for stock here.

- **Active/Archived Filter:** This changes the list view from active items to allow you to view archived items. You can archive or reactivate an item from its edit page.
- **Search:** Filters the list to show items you're looking for. You can search for full or partial matches from a range of fields on the list, including a combination of terms from different fields. The example below uses partial terms from the item code, the name and the description. Search terms are separated with space.

Item Code	Name	Description	Type 
IS004	Call Out Fee	Carrier Allure 7.0kW	UNT

You can select a location to filter for only items stored at that location:

2/12

You can also filter by whether inventory items currently have stock, and this is also where you can choose to view additional columns:

Filter By

Location

Stock

☒ Show only items with Stock on Hand

☐ Show only items below re-order at qty

☐ Show only items above high stock qty

Columns

☒ Re-order at qty

☐ High Stock qty

Tracked items may have a re-order at qty and a high stock qty set. If the items are below or above these amounts, arrows will appear next to the stock amount to let you know that the item exceeds a threshold.

.60	29.95	38.7%	50	50	0	1,080.00
00	The current available amount of this item exceeds its high stock quantity (60) by 4.					
.00	24.95	38.6%	64	↑ 64	0	1,152.00
.00	129.00	34.4%	20	20	0	1,920.00
.80	22.95	36.6%	800	↑ 800	0	13,440.00

### Editing your items

To edit or view more details about an item, simply click on the row of that item from the list. This will bring up the inventory edit page.

**Note:** Some of the fields on this page may be disabled. This can include the following:

- **Stock type:** Changing stock type is only permissible for tracked items if the quantity on hand is zero. You can use the Stock Adjustment function detailed below in this article to temporarily remove items on hand to allow a stock type change. You will need to reverse the stock adjustment to bring the stock back on.
- **Cost Per Unit:** Once any purchasing has occurred for tracked items, this field becomes disabled and is calculated by the system based off an average cost of stock on hand. If you'd like to adjust this cost, you can use the Stock Adjustment function detailed below in this article.

- **Price per Unit:** This field will be disabled if the option to set price by markup on cost is enabled. To enable this field simply toggle that option. You can also update the price by changing the Markup % field.
- **Markup %:** This field will be disabled if the option to set price by markup on cost is disabled. To enable this field simply toggle that option. You can also update this field by changing the Price per Unit field.

## Suppliers

On this tab you can add one or more suppliers for the inventory item. This tab provides a manual process for adding suppliers. Note: this process can also be done in bulk. Please refer to this article for details on bulk import of [Supplier Catalogues](#).

To add a supplier manually for the item, simply click on the green Add button:

Arlec 9W Tri Colour Dimmable LED Downlights (IS002)

General Suppliers Attachments Orders Stock Adjustments Stock on Hand Instances Stock Movement Reservations Job History

Add ⓘ

Supplier ▾	Supplier Price ▾	Lead Time (days) ▾	Item Order Priority ▾	Supplier Order Priority ▾	Last Ordered Date ▾	Supplier Ref. ▾	Supplier SKU ▾
Building Supplies Limited	\$3.5000	1	-	-	19 Mar 2024	Arlec 9W Tri Colour Dimmable LED Downlights	BSL-T2
Local Hardware	\$3.0000	2	-	-	25 Mar 2024	Arlec 9W Tri Colour Dimmable LED Downlights	LHW-T2
Qantas	\$5.0000	2	2	4	-	LED-LAMP THREE CLR 2020	LED-LAMP2020

This will present the following modal:

## Add a new supplier for Arlec 9W Tri Colour Dimmable LED Downlights ×

Please complete the details below to add a new supplier for the item ?

Supplier	<input type="text" value="Select supplier"/>
Supplier price	<input type="text" value="\$"/>
Lead Time (days)	<input type="text"/>
Item Order Priority	<input type="text"/>
Supplier Order Priority	<input type="text"/>
Supplier Ref.	<input type="text"/>
Supplier SKU	<input type="text"/>

Select or enter the appropriate information for the supplier:

- Supplier Price (**required field**): Enter the unit price you pay a supplier for an item.
- Lead Time (days): Estimated number of business days that a supplier's product will arrive after being ordered.
- Item Order Priority: Specific order of preference that a supplier is chosen to fulfill a purchase order for this item. Example: for the same stock item, if Amazon has an item priority of 2, and The Iconic has an item priority of 1, the system will default to The Iconic when creating a purchase order for the item.
- Supplier Order Priority: General order of preference that a supplier is chosen to fulfill a purchase order if Item Order Priority is not set. Example: for the same stock item, if Amazon has a Supplier Order Priority of 1, and The Iconic has a Supplier Order Priority of 2, the system will default to Amazon when creating an order for the item.
- Supplier Ref. (**required field**): Name used by the supplier for this item (i.e. what the supplier names the item in their own catalogue)
- Supplier SKU (**required field**): Stock keeping unit (SKU) used by the supplier for this item (i.e. what the supplier item code is for the item in their own catalogue)

To edit the information for a supplier, simply click on the row in the list and a modal for editing the information will appear.

To delete this supplier from the list, please refer to [the Supplier section](#) of the Knowledge Base. You will need to navigate to the supplier page and delete the item from the supplier's catalogue.

# Attachments

This tab allows you to upload attachments for this inventory item, such as spec sheets, manuals, photographs, et cetera for safe keeping. Attachments can be any file type. However, there is a limit of 100Mb per attachment.

Resources > Inventory > Arlec 9W Tri Colour Dimmable LED Downlights (IS002) Feedback

## Stock Adjustments (Tracked only)

This tab allows you to adjust the quantity, and cost of the item.

### Arlec 9W Tri Colour Dimmable LED Downlights (IS002)

General	Suppliers	Attachments	Orders	Stock Adjustments	Stock on Hand Instances	Stock Movement	Reservations	Job History
---------	-----------	-------------	--------	-------------------	-------------------------	----------------	--------------	-------------

Adjustment Type	<input type="button" value="Increase Stock"/> <input checked="" type="button" value="Decrease Stock"/>
Location	<input type="text" value="WH1"/>
Current Quantity on Hand	<input type="text" value="28"/>
Current Quantity at Location	<input type="text" value="24"/>
Quantity to Remove	<input type="text" value="1"/>
Reason	<input type="text" value="RTM - quality issue"/>
Financial Adjustment Required	<input checked="" type="button" value="Yes"/> <input type="button" value="No"/> <small>Note: this transaction will make a manual journal in your xero file to account for the adjustment of this stock item. This transaction cannot be reversed.</small>
Current Cost/Unit	<input type="text" value="3.7400"/>
New Cost/Unit	<input type="text" value="3.7400"/>
Adjustment Asset Account	<input type="text" value="Suspense"/>
Adjustment Expense Account	<input type="text" value="Cost of Goods Sold"/>
<input type="button" value="Process Stock Adjustment"/>	

To make a stock adjustment, follow these steps:

- Adjustment Type (**Required Field**): Choose whether you'd like to increase or decrease the stock.
- Location (**Required Field**): Select the location you would like to make the adjustment to. Note, if you have stock in multiple locations, you'll need to adjust each location one at a time.
- Current Quantity on Hand: This is a read only field which shows you the quantity on hand in all locations (not just the one you have selected above).
- Current Quantity at Location: This is a read only field which shows you the quantity on hand specifically in the location you have selected.
- Quantity to Add/Remove (**Required Field**): This is the quantity you want to make the adjustment for.
- Reason (**Required Field**): Enter a reason for the adjustment. This will be stored for future reference.
- Financial Adjustment Required (**Required Field**): If this option is selected, then the adjustment transaction will make a manual journal in your xero file to account for the adjustment of this stock item. This transaction cannot be reversed. If this field is selected, the following additional options are shown:

**Note:** This is an advanced option and we recommend you obtain advice from your accountant or bookkeeper before choosing this option. Typically, we would suggest that you leave this on for most cases so that the value of the stock on your Xero file is maintained correctly at all times, however there are instances where you may not want to make this adjustment (i.e., when recognising opening stock, and other examples) so the option is provided.

- Current Cost/Unit: Read only field showing the current cost per unit.
- New Cost/Unit: Editable field which allows you to set the new cost/unit of the item once the adjustment is processed. If you aren't intending to adjust the cost of the item, only the quantity, then leave this field as per the default.
- Adjustment Asset Account: Read only field showing the asset account side of the manual journal which will be created for this transaction in Xero. This field is taken from the general tab of the inventory item edit page.
- Adjustment Expense Account: Read only field showing the expense account side of the manual journal which will be created for this transaction in Xero. This field is taken from the general tab of the inventory item edit page.

---

## Stock on hand instances (Tracked only)

This tab shows you a list of all the stock on hand, where they are located and what their serial number is (for tracked per instance items only).
