- Select the parameters of the report:
- - Choose a date range of interest
 - Choose an Adjustment Type (optional – if none is chosen all will show)
 - Stock Item (optional – if none is chosen all will show)
- Hit the Generate Report button. The results will be shown in the list.
- Export the data shown on the page using the export button.

Explanation of Adjustment Types:

- Stock Take
 - Records the details of a manual stock take
- Goods Receipt
 - Records when an item is received from a PO into stock
- Record Consumables
 - Records when an item is consumed onto a Job. For POS jobs this happens automatically, so this is a proxy for sales in the period.
- Return to Stock
 - Records when an item is removed from a job and brought back to stock.
